7:30 p.m. Preaching at Bow Island

Everybody is welcome at these meetings
C.O. Hockin, Pastor

Rink Association Meeting

There was a splendid attendance at the Bow Island Curling Rink Association meeting last Thursday evening which was held in the Town Hall, about 40 people attending, arrangements were made for Mr. West Potter to look after the Curling and Skating Rinks for the winter, and in fact all the many things connected with the Curling Rink were discussed and all are looking forward to a splendid time this winter, the building plans have been altered so that the spectators can sit and watch the sport of Curling, whilst yet in the warm for the end of the Rink has a nice room at the entrance to accommodate the watchers, while the Rink has been extended to the further end to the west, so as to give the full length that the players require. The shack which was adjoining the curling rink and used last winter as a place to get warmed up has been taken down

The work in starting completion now, the Skating Rink will also have more room this winter and will afford great sport for all who wish to skate, the boys who have been working on the Skating Rink, have surely worked well and all praise is due to them for their energy so well spent, the weather is getting into condition now to very soon freeze both Curling and Skating Rinks, and make a splendid finish to all the energies that have been expended by all the Committee and Workers. We sincerely hope it will be a huge success for all who enjoy those sports

The following Officers were elected: President J.W. Reid; Vice President F.J. Henderson; Secretary L.M. Cullen; Treasurer Rev. Hockin. The following were elected as directors: H.R. Roach, Dr. Cairnes, Geo. Caldwell, R.H. Robertson, and W. Foster. The ice committee is: C. Bateman and P. Duffy. The skis being: F. Henderson, J. Reid, H. Roach, E. Willmott, E. Dick, C. Bateman and E. Anderson

The Ladies elected are: President Mrs. P. Duffy; Vice President Mrs. A. E. Anderson; Sec-Treas. Mrs. C.H. Bell

The Services at All Saints' Church conducted by the Rev. Leacroft of Taber were well attended last Sunday the Church being full in the evening, we are glad to see so many faces there and we trust the services will always be so well attended

Mrs. Bainbow had her little son privately christened last Sunday (Jack Thomas) at the home of Mrs. T. B. Hands in town, the little one was not at all well, so the Rev. Leacroft kindly went down to the house and christened him there, we hope the little fellow will soon be well again

Mr. and Mrs. A. E. Anderson had the Rev. Leacroft last Sunday and Monday as their guests. Mr. Leacroft left for Taber on Monday

The Ladies Aid of the All Saints' Church did not meet with Mrs. Roach yesterday Thursday, as was previously announced, it being postponed on account of the sale of work by the United Ladies, taking place on that same date. The All Saints' Ladies Aid will meet TOMORROW, the 1st of December at 8 p.m. at Mrs. Roach's residence

E.J. Kipp is relieving S.J. Weeks who is leaving on his holidays Nov. 30th

A little more snow fell on Tuesday and seems to be adding a little more each day since, whilst the temperature goes lower, we have been very fortunate to have such fine open weather as we have had up to now, it has helped us all

Mrs. A. Houghton and son Claire, returned home last Saturday evening from the Coast, where they have been all the summer

Mr. A. Gage left on Wednesday for the gas wells ten miles south of Radium with a load of material

The Dance put on by the Curling Club on Wednesday evening was very well attended, all the surrounding districts being represented, some coming from Grassy Lake, Burdett and Winnifred. The Curling Club Ladies served a free lunch which, was very much appreciated by all, and every one reports a grand time

The Curling Club will be putting on a series of dances during the winter

George Clemenceau Called The Tiger of France

Here is an Anecdote of him

Georges Clemenceau's anti-clerical ideas were always very pronounced until he witnessed the courageous behavior under fire of Catholic priests mobilized during the war. Then his point of view underwent a change, and his attitude toward the Church of Rome at present is not antagonistic. As Clemenceau was being carried into his home on the Rue Franklin after the attempt on his life by the Anarchist youth Cottin, a priest belonging to a congregation with headquarters adjoining the garden of the former premier's house rushed up to him and offered him good services

"Thank you, my reverend father," said Clemenceau not unkindly, "but I don't think I'll need you this time." Then he added earnestly: "However, if you wish to be accessible to me," he added, "I should like you to have that tree removed pointing to a tall poplar in the priest's yard which throws a shade into the premier's garden—"It keeps the beautiful sun away from me!"

"It shall be felled today," replied the priest. "I should not like to be responsible for keeping you from enjoying the only sight of heaven which a sinner such as you are, is likely to have."

They both laughed and shook hands the priest wishing him a prompt convalescence

Look Out For Storms

Poster, the Weather Prophet, is now telling us that these parts will have the highest temperatures on December 3rd and 8th, and lowest temperatures on 1st and 6th. Average warmer than usual; precipitation normal; most severe storms and the most precipitation near 3rd-5th

All indications are that first week of December will be unusually warm with more than usual rain, followed by very bad, cold stormy weather, inclined towards blizzards. There are so many great magnets, planets, concerned in that great storm period that I will not be able to get the exact dates. Better get your outdoor affairs arranged before end of November, although you may get some good weather first few days of December. When that great storm breaks you will need shelter. Some good weather is expected between this great storm period and the bad storms of the Christmas holidays

Hopper Menace Is Not Yet Over

Battle Against Insects Must be Renewed Next Spring Says
A. W. Murphy

In a special dispatch to the Albertan it is reported that W.L. Seaman, Dominion entomologist at the Lethbridge experimental farm, stated recently that "the devastating roadside grasshopper is a thing of the past in Southern Alberta and that in 1923 there would be no serious outbreak"

Mr. A.W. Murphy, one of the government officials in charge of the grasshopper campaign, interpreted the statement that for from the grasshopper menace being removed from this district, next year a more energetic campaign than ever will be necessary in order to combat the destructive insects

Mr. Murphy is of the opinion that if Mr. Seaman's statement is correct, his remarks must have had reference to another district. So far as the south-east corner of the province is concerned an active aggressive campaign must be carried out in order to keep the hoppers down. The department is planning for an early start next spring and if the same support is given next year as was received this, feels sure that the campaign will be successful

The world famous Assam teas in RED ROSE give it that richness and fragrance that so distinguish it from ordinary teas.

RED ROSE TEA "is good tea"

Begin At Home

In this column last week approval was expressed of the announced intention of the Minister of the Interior to have legislation introduced at the next session of Parliament making provision for the granting of extra homesteads to men whose present holdings had been found to be unsuitable for successful agricultural operations. At the same time the opinion was expressed that the policy now proposed to be followed in the case of these homesteaders should be extended to include other farmers located on lands found to be unsuitable for farming.

The Canada Colonization Association has embarked on a comprehensive scheme of land settlement which has adopted as its objective the settlement of ten million people in Canada in ten years. One of the cardinal features of its plan is to make careful selection of the land upon which these settlers are placed, and to keep close watch of their progress with a view to assisting them to succeed. To that end it is proposed to establish local community clubs to care for, assist, and extend a helping hand and friendly advice to these settlers. Should it be found that, from causes over which the settler has no control, he is not succeeding, and cannot succeed, in his chosen location, then, rather than have him fail and leave the country, he is to be assisted to locate elsewhere in Canada where he can succeed.

This is a good policy indeed as settlers yet to come are concerned—and who questions its wisdom?—that it is not equally good policy to apply to people already here and who are not making a success in their present locations?

There are thousands of farmers who, after years of effort, are reluctantly forced to the conclusion that they must pull up stakes, and try a new location. If, instead of at once beginning to encourage people to come to Canada from other lands, the Canada Colonization Association devoted its efforts for the first year to finding out farmers who are in this predicament, and assisting them to new locations in these Western Provinces where they can make a success, that Association would be doing a splendid stroke of business for Canada, would establish the confidence of all people in its programme and policy, and would lay the foundation for future years of successful operation in the bringing in and locating of new settlers.

Settlers already here, but who have not made a success of farming because of conditions absolutely beyond their control, are the very type this country needs and can ill afford to lose. These men have courage. They are hard workers. They are optimistic, and have year after year striven to make good. It is through no fault of their own that success has not attended their efforts. The Canada Colonization Association, therefore, can hardly do better than to apply to these men the very policy they propose to apply to all new settlers coming to Canada under their auspices.

There are, admittedly, difficulties to be overcome. Many of these men are heavily in debt. Mortgage has been piled on mortgage on the unsuitable lands they now occupy and are attempting to farm. Holders of these mortgages may be averse to having their money moved away. But much as it is a little hope of success attending their efforts if they remain, and as, therefore, the mortgage companies would have to take a loss in any event, would it not be the part of wisdom to confer with such mortgage holders now and reach a settlement other than which these people could be moved to new locations within the Dominion? Moved elsewhere, and success attending their efforts, most of them would gradually discharge their obligations until under present conditions there is slight hope of ever being done. Again, located under more favorable circumstances these people would become profitable clients for investors of money which would be used to develop lands capable of earning the interest charges and ultimately pay off principal. As it now is these men cannot earn the interest, let alone see any prospect of ever paying off the principal indebtedness.

Any consideration of a sound and permanent immigration and settlement policy for Canada which does not at the outset take into account, present, unsuitable settlers into consideration is not a sound nor complete policy because it would overlook the basic idea on which successful settlement must rest. The Canada Colonization Association has a splendid opportunity to put its proposed policy to a practical test without any large expenditure of money. It will not call for any expenditures for publicity purposes, yet by making contact and successful farmers out of many who have not yet tasted the sweets of success, it will prove to be the most valuable kind of publicity for its future work and effort in inducing others to settle in Canada.

British Columbia Fruit Wine

Despatches from London, England, announce that British Columbia apples won four first prizes at the Imperial Food Show in London. And (London)—that British Columbia pears won two first prizes.

A Backslider

—Somebody passed a counter-felt shilling on Bob a year ago, and he hasn't been able to get rid of it since. Bob told his wife recently, "What the hell back home he said he was returning as a pronounced optimist. Mr. Flindley returned a few days ago from a trip which had taken him to the Pacific coast and while staying in Winnipeg he had every opportunity of conferring with the reliable type of men who have made it at stake in this country. From what he has learned from such authorities in almost every district in the country, he expected from what he has observed, he feels every confidence in Canada's future."

Experience of One Dollar

Record For Fourteen Days Was Made On Circular

A new dollar bill was put in circulation in Chicago by the North Shore Chamber of Commerce. Altered was a circular upon which was to be recorded the experience of this dollar. It returned in 14 days after having changed hands: Five times for salary, five for tobacco, five for cigarettes, three for candy, two for men's furnishings, once for collar buttons, three for meals, once for auto for a turn, once for beer, once for washing soda, with a start, twice for shoes and once for tooth paste.

CAN THE DEAF

BE MADE TO HEAR?

This question can be answered both ways. If the deafness is due to Catarrh, surgery is general if the sufferer is in the use of Catarrh, and thereby drives Catarrh out of the system. Penetrating through the membrane of the ear, the sound of Catarrh and thereby allows nature to re-absorb itself. For Catarrh relief, the sufferer must use the eye, nose, throat and other symptoms associated with Catarrh. Catarrh, however, will be more than pleased with the quick improvement in his condition. Two months' treatment. One Dollar, sold everywhere, or the Catarrh Cure Co., Montreal.

Carat Gold

What Is Meant When We Speak Of 18 Carats

One often speaks of a ring being 18 carat gold or 22 or 18 carat watch cases or jewelry, but all is not what it seems to be. 18 carat gold is what is meant by 18, 18 or 22.

Gold is divided into 24 parts—the 18 carat is said to contain 24 carats—the carat being just a measure of weight. A ring or watch case marked 18k or 18k means that 14 or 18 parts of it are pure gold, the balance being made up of some other metal, or alloy, copper being generally used. If articles of jewelry were made of pure gold they would wear well, but would be a very soft metal, and it is, therefore, necessary to mix the gold with some harder substance.

THE FALL WEATHER

HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day is warm and bright, and the next wet and cold. These sudden changes bring on colds, coughs and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little one's bowels regular, the bowels break up colds and make baby's stomach healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Was Was the Use?

"Why don't you get your father to help you with your lessons, William?" "I did, but he tried to cheat me, and he doesn't know any more about fractions than I do."

Oil that is Famous—Though

Canada was not the birthplace of Dr. Thomas' Eucalypti. It is the home of that famous compound. From being sold in small quantities, it has spread to all parts of the world, and has been sold in Australia and New Zealand. That is a fair enough in itself, but for the oil, for in all these countries it is on sale in its own right.

Confidence In Canada

Director of Scottish Loan Company Pleased With Conditions in Canada

As the director of a Scottish company which has loaned some millions of dollars in Canada, J. Arthur Findlay, of Glasgow, Scotland, said that when he came on an inspection trip a few months ago, he arrived as a moderate optimist; but as he was about to leave, he was a pronounced optimist. Mr. Findlay returned a few days ago from a trip which had taken him to the Pacific coast and while staying in Winnipeg he had every opportunity of conferring with the reliable type of men who have made it at stake in this country. From what he has learned from such authorities in almost every district in the country, he expected from what he has observed, he feels every confidence in Canada's future.

Four Million New Trees

Free distribution of four million trees, enough to constitute a fair sized forest, is the spring programme of the Canadian Government Forestry Farm at Indian Head, Sask. The objects of the leaders of afforestation is a plantation of five or six hundred on every quarter section of the Canadian prairie. There can be no exaggeration of the value of trees to any community.

Mina's Lincter For Gargle in Cows

Australia's Poet Dies Penniless

People Recognized His Genius When It Was Too Late

They gave Henry Herbert Lawton, the Australian poet and novelist, a state funeral in Sydney. Despatches described it as an "imposing affair," fitting the occasion of the laying out of the nation's avowed singer, and there was due applause from the world at large for this splendid recognition of a poet's worth—when he was dead.

While he was alive, however, Poet Lawton did not fare so well. "Australia's greatest minstrel," as he was called at the time of the funeral, died penniless. Indeed, if it had not been for the public funeral under Government auspices he would have been buried as a pauper. He had been in receipt of a small pension from the Government for some time before his death, and this should be ascribed to the State of New South Wales with proper appreciation, for it was it not virtually a pension for the glorious act of penning a poem?

Still, Lawton lived in poverty. The people did not realize that they had a genius in their country until he was laid away with "funeral trappings" besting Government recognition. Then they began to buy his books. Poor as he was, Poet Lawton left a will. All his worldly belongings were mentioned in bequests. These were: Two suits of clothes, an overcoat, a necktie, a collar stud, a pen, a pipe, a matchbox, a pair of spectacles, a walking stick, and two packets of tobacco.

Hoarseness Rubbed Away

Quickly By Nerviline

Changeable weather causes congestion of the throat, and the voice is drawn from the inflamed part, and this is speedily done by applying Nerviline. The beauty of Nerviline is that it penetrates quickly. It draws out the inflammation, eases the pain, makes the chest and throat free for healthy breathing. For relieving coughs, hoarseness, Nerviline is the proper remedy. Thousands say so. Large 35c bottles sold everywhere.

Object Lesson of Contentment

Nine Years on Hospital Cot Falls to Make Man Dependable

Nine years on a hospital cot without moving, has made Anthony McDowell, of Cedar Rapids, Mich., despondent. Slowly his body is being ossified. He is forty-two. Since his wife was thirteen, every joint in his body has been growing solid, and now even the jawbones have become fixed. It was necessary to pull one of his teeth so that a tube might be inserted for food.

"It's an object lesson of contentment. It does one good to meet him," said Dr. A. H. Edwards, who has studied the case for twenty years. He league baseball, chess and radio are his hobbies. Friends regularly provided a radio set.

No surgical operation is necessary in removing cases if Holloway's Corn Remover be used.

Long Journey In Prairie Schooner

After a summer's travel from the State of Idaho, two farmers W. W. Harris and H. H. Harris, who have made their 1,500-mile journey in a prairie schooner and have achieved their goal by securing homesteads in the Peace Camp country, Alberta.

INDIGESTION, GAS,

UPSET STOMACH.

Instantly! "Pape's Diapiesis"

Corrects Stomach so

Meals Digest

The moment you eat a tablet of "Pape's Diapiesis" your indigestion is cured. Bile, gas, and acid are neutralized, and the stomach is set to work. No flatulence, heartburn, palpitation, or misery—nothing. Correct your digestion for a few cents. Each package guaranteed by druggist to overcome stomach trouble.

Swedish mothers put money into their child's first bath, believing that this brings future wealth.

Police-men of Uncton, Va., are forbidden to wear mustache or whiskers.

Constipation

Banished

A druggist says: "For nearly thirty years I have recommended the Extract of Rho-Kee, known as Rho-Kee's Curative Syrup, for curing and permanently relieving constipation and indigestion. It is an old reliable remedy, and never fails to do the work." 30¢ bottles daily. C. W. Rho-Kee, 50c and \$1.00 bottles.

Less Coal Mined

Canadian Coal Output Is Below the Average Record

The output of coal from Canadian mines during the month of July, 1922, increased approximately 47,000 tons, or 6 per cent, above the production for the preceding month, and amounted in all to 855,000 tons, but in spite of this increase the output fell short of the average record for the same month in the three preceding years by 203,000 tons, or 19 per cent, according to a statement issued by the Dominion Bureau of Statistics. Considered in relation to the three-year average for the first seven months of the calendar year, the output this year was less by 1,125,000 tons, or 14 per cent.

Imports of coal in July declined appreciably from the quantity reported for June 10, amounting in all to 447,000 tons, 13 per cent, below the record for the preceding month. There was considerable revival in the export trade and a total of 243,000 tons was cleared for foreign destinations, as compared with 50,000 tons in the preceding month.

Robert Forke Chosen As New Leader Of The Progressive Party

Winnipeg—Robert Forke, M.P. for Brandon, is the successor of Hon. T. A. Crerar as leader of the Progressive Party in the House of Commons. Mr. Forke's election came as the result of a secret ballot which gave him a substantial majority over J. T. Shaw, Calgary. R. A. Hoey, M.P., had previously declined the nomination, and the majority of delegates disapproved of inviting A. R. McMaster, Liberal M.P. for Bruce, Quebec, to accept the chairmanship, a proposal made by Mr. Hoey on the grounds that McMaster might bring a good following if he could be induced to join the party.

The selection of Mr. Forke as leader appears to be the basis of some misunderstanding. Though named to head the party, the understanding of a number of delegates is that he will be a House leader only, aided by an Advisory Committee, and that a national leader will be chosen at a Progressive convention in the summer of 1922. His status, though not "officially" defined in the communiqué issued this afternoon, appears, however, to be that of a recognized national chief.

The feature of the concluding all-things of the caucus were:

Decision to create a national political fund.

Adherence to the progressive ideal of including in the party, men and women of common ideals from all walks of life.

Unalterable opposition to cooperation or "fusion" with the Liberal Party.

The creation of a central organization, or some federal agency for co-ordinating the political efforts of the party.

The creation of a central organization, or some federal agency for co-ordinating the political efforts of the party.

Authority to members to consult constituents in the matter of a proposed national progressive organization.

Calling of a national convention in 1922.

Coal Miners May Strike

Edmonton—Approximately 1,100 miners employed in the Edmonton field may go on strike soon unless the United Mine Workers of America receive recognition from the operators in this district, according to William Sherman, President of the U.M.W.A. of District 18.

If the situation crystallizes and results in a strike, it will be the most serious labor trouble that has affected the mining industry in District 18 since the settlement of a District miners' strike last fall, officials say.

Find Proceeds of Portage Robbery

Winnipeg—The greater part of the money and registered mail stolen from the post office at Portage la Prairie on Oct. 31 has been recovered. It was found after the seizure of a Portage house. Harry C. Platt is in custody in connection with the robbery.

Hon. T. A. Crerar Resigns As Leader Of Progressive Party

Winnipeg—With only three of his colleagues—Kennedy, of Glenarry-Storaton; Kellner, of East Edmonton, and Warner, of Strathcona—Progressive Members of Parliament and the Progressive senator, Hon. T. A. Crerar, met in caucus here and received the resignation of Hon. T. A. Crerar, their leader. In a long letter which Mr. Crerar himself read, he explained the business and personal reasons which were the immediate cause of his decision, gave in considerable detail his views on public questions of the day and on the future of the party, and suggested continued co-operation with the Liberal Government in matters of public welfare along the lines of the Progressive policy of last session.

It was stated after the session that

Mr. Crerar's resignation was heard with some surprise, despite all predictions, and a good deal of regret. Mr. Crerar announced in his resignation from the leadership of the National Progressive Party:

"I shall continue to fight as a member in the ranks," he declared at the close of a long letter to T. W. Caldwell, M.P., chairman of the caucus, in which he discussed his own position, the political questions of the day and the future of the Progressive movement."

Mr. Crerar stated that business obligations and his personal position made it impossible for him to continue the leadership and that, lest these questions not intervened, his retention of the post would have depended upon clear understanding and statement of the Progressive programme."

Reign declaration of the Progressive party to farmers would, Mr. Crerar desired in the letter, render not only a disservice to the country as a whole but to the very people the movement was created to assist. All people of good-will who believed in certain definite principles as applied to public policies, should be included.

NEW DISCOVERY OF OIL IN ALBERTA

GEOLOGIST SAYS PROSPECTS FOR A PRODUCING WELL ARE ASSURED

Calgary—Definite tracings of oil have been found in McLean-Mitchell well, near Coates at a depth of 2,560 feet, according to word received at Calgary at offices of the Coates Street Energy Oil, Ltd. According to George M. Mitchell, an expert on small quantities of oil of good quality could be collected from the well for the previous 26 feet. The oil was found in shale formation and it is expected that within the next 100 or 150 feet the oil-bearing sands will be encountered, when it is confidently expected that production will be found. A prominent geologist who visited the well according to word received here by C. B. Mitchell, M.A., stated that prospects for a producing well are assured.

Reports coming in from the Coates' field are to the effect that excitement in the south district and Lethbridge had reached a high pitch and that the hopes of the people in Southern Alberta for a duplication of the Sunburst Vevin oil field will be realized at an early date," Mr. Mitchell said.

Situation in Near East

Grave Reports Reaching Britain That Give Cause for Uneasiness

London—Telegraphic communication between London and Constantinople continues interrupted. The only news that is coming in is reaching London slowly, and through various routes.

Dispatches received by the Foreign and War Offices by naval wireless, indicated that the Allied commissioners were then awaiting a definite reply from the Ankara Government to their demand that the Turks recede from their attitude, which the Allies regarded as out of accord with the Mudros and Mudanya conventions. The dispatch showed that the Allied representatives had to lodge a strong protest with the British Consul, the nationalist governor, against the execution of Ali Kemal Bey, editor of Sabah, an anti-Allied paper.

The British Foreign Office has announced to get in touch with General Haldane, in charge of the British forces at Constantinople, and the General's message was of such a nature as to cause officials to say that the situation in the Near East was most ominous grave—even more so than just the last crisis there.

Oil From Tar Sands

New Oil Refinery May Be Established At Edmonton

Edmonton, Alta.—Given certain conditions as to economical mining, direct rail connections and a reasonable freight rate on crude oil, the establishment of an oil refinery plant somewhere on the Athabasca River, near McMurray, is a reasonable certainty for the future, according to H. H. Hammond, General Manager and a Director of the million dollar Hydro-Carbon Products Corporation.

Who is a business visitor to the city. He states that the process, patented in Canada by the company, has definitely established the fact that tar sands of the Athabasca, containing crude oil of a low quality, can be commercially treated, and the oil and by-products extracted, on a large scale.

Resume Construction Of B.C. University

Government Will Advance Money For Completion of Buildings

Victoria—An immediate start on the construction of the Provincial University Buildings in Port George municipality, close to Vancouver, has been made by the British Columbia Government, Premier John Oliver announced. Buildings commenced several years ago and partly erected will be completed as soon as possible. The Government will advance the money for the work.

The first outlay on construction will be \$1,000,000.

Mild Winter Predicted

Trappers Say Animals Not Preparing For Cold Weather

North Bay, Ont.—Residents of the northern woods, long famed for their prognostics in regard to coming winter, are unanimous this fall that all signs point to an unusually mild winter.

In support of this forecast, visiting trappers state definitely that the beavers are unusually quiet and that the muskrats are unusually quiet.

Observers also state that chipmunks and squirrels are collecting extremely small stores of food for the coming months.

WESTERN EDITORS

P. J. Murphy, formerly Editor and Proprietor of The Press, Danbury, Alta. Mr. Murphy sold his interests at Danbury to Mr. A. L. Easty.

Fire Destroys Eleven Autos

Origin of \$25,000 Blaze in Gravelburg Garage Unknown

Gravelburg—Fire caused a total loss of \$25,000 when Danbury's Gravelburg was burned to the ground. The origin of the fire is unknown. All the stocks of repairs, oil and eleven cars were destroyed, only one car being taken out of the burning building before the flames drove the firemen out.

Several gasoline pumps were destroyed making the work of fire-fighting dangerous. The fire started in the workshop at the back of the garage and spread so quickly that the workmen barely had time to get out without being burned.

CONFERENCE HELD AT OTTAWA TO DISCUSS IMMIGRATION QUESTION

OTTAWA—Hon. Charles Stewart, Minister of Immigration, recently advised the conference on immigration held here, in which the minister said he was naturally greatly interested in the effort being made to get settlers, and was sure that the conference would produce good results.

He said it was the policy of the Government to lead at when it was needed, and he appreciated receiving in concrete form the results of the experience of the various transportation representatives. He also expressed the hope that such conferences would be held frequently in the future or it was only through heavy cooperation and through the co-ordinating of efforts that the best results could be obtained.

Today British and continental immigration received attention. Owing to the prevalence today of J. E. Smith, Superintendent of Immigration for the Dominion Government in London, and Sir George Mel. Brown, of the Canadian Pacific Railway, the members had the benefit of firsthand information on the situation both in the United Kingdom and in Canada.

The two gave an outline of the measures they considered necessary for the doing of effective immigration work overseas.

It came out during the discussion that the Government has under consideration the extending of an invitation to those countries where a sizable settler may be secured, and who are eligible for citizenship.

A feature of the conference was the spirit of hearty co-operation manifested. The co-ordinating of effort on the part of transportation and colonization interests with the government will, it is said, produce especially good results in the publicity and advertising work, eliminating much duplication.

It is understood that as a result of the conference the Government will invite the transportation interests to appoint representatives to a smaller standing committee to co-ordinate all the publicity efforts of the parties involved.

Latest Returns of U.S. Elections Washington—On the face of practically complete unofficial returns from Tuesday's elections, the exact lineup by the parties in the sixty-third Congress will be:

House—Republicans, 225; Democrats, 207; Socialist, 1; Independent, 1; Farmer-Labor, 1.

Senate—Republicans, 53; Democrats, 42; Farmer-Labor, 1.

Woman Injured By Stray Bullet

Beaver River, Mont.—A stray bullet, believed to be from the rifle of a hunter, entered a window at the home of Mrs. Edwin M. House, of Watford, while Mrs. House was telephoning. The bullet clipped off her shoulder.

The woman, fractured her leg and finally lodged in her shoulder.

The British Empire Must Be In Harmony On Foreign Policies

London.—Speaking at the annual Lord Mayor's banquet at the Guildhall, Premier Bonar Law dealt with the foreign policy of his Government and laid special emphasis on the fact that British foreign policy must have the support of the Dominions throughout the Empire.

"The fact is," said the Prime Minister, "that in the late war the great Dominions sprang into manhood in their relations to the Mother Country and there were changes in that hour. They will never be the same again. As Lord Curzon said, in all our policy we have to think not only of public opinion at home, but have to take every man in our power to make certain that we have the support of public opinion throughout the Empire."

"I think also it is no disadvantage to put it at any higher level than at the time when these Dominions have reached manhood, a man born in one of them should be prime minister."

Referring to conditions in the Near East, Mr. Bonar Law said: "I want to state what the position is at the moment in Constantinople. I cannot tell you anything new except this, that so far, all the Allies are acting with the most complete harmony and without animosity. I say this also that if, as I have every reason not only

to hope but to believe, that continues, I am sure the difficulty will be overcome. There is only one way at this moment by which peace can be secured and the troubles of Europe overcome, and that is that the Allies, who won the war together, should act together in securing the peace which they alone can secure. If it speak of only two of them, it is not to blame I do not think of the others, but because these two are especially interested in the trouble in the Near East.

"I shall speak first of Italy. We do not forget that Italy came into the war at the most critical time of the war. We do not forget that she suffered as much, probably, as any other nation, and that it was precisely the invasion of Italy by the Germans five years ago which made the clouds look so black. The people of this country do not forget those things, and whatever truth there may be at the surface, there is a deep sense of comradeship with the nation that played that part.

"And what about France? You may ask what you owe to French and English newspapers, but this generation at least will never forget the sacrifices that it has made in the crisis in the history of the world. (Cheers.)

"All these things are not going to be forgotten. There is only one way of peace can be secured—unity of purpose."

Conference Held At Ottawa To Discuss Immigration Question

OTTAWA—Hon. Charles Stewart, Minister of Immigration, recently advised the conference on immigration held here, in which the minister said he was naturally greatly interested in the effort being made to get settlers, and was sure that the conference would produce good results.

He said it was the policy of the Government to lead at when it was needed, and he appreciated receiving in concrete form the results of the experience of the various transportation representatives. He also expressed the hope that such conferences would be held frequently in the future or it was only through heavy cooperation and through the co-ordinating of efforts that the best results could be obtained.

Today British and continental immigration received attention. Owing to the prevalence today of J. E. Smith, Superintendent of Immigration for the Dominion Government in London, and Sir George Mel. Brown, of the Canadian Pacific Railway, the members had the benefit of firsthand information on the situation both in the United Kingdom and in Canada.

The two gave an outline of the measures they considered necessary for the doing of effective immigration work overseas.

It came out during the discussion that the Government has under consideration the extending of an invitation to those countries where a sizable settler may be secured, and who are eligible for citizenship.

A feature of the conference was the spirit of hearty co-operation manifested. The co-ordinating of effort on the part of transportation and colonization interests with the government will, it is said, produce especially good results in the publicity and advertising work, eliminating much duplication.

It is understood that as a result of the conference the Government will invite the transportation interests to appoint representatives to a smaller standing committee to co-ordinate all the publicity efforts of the parties involved.

CLOSE LIQUOR EXPORT HOUSES

SASKATCHEWAN GOVERNMENT MAKES MOVE TO CANCEL LICENSES

OTTAWA—An order-in-council has been passed to close out the liquor export establishments which have been flourishing in Saskatchewan. By the provisions of the amendment last session of the Canada Temperance Act, the Government was empowered to cancel the license of such concerns if requested by an order-in-council of the Provincial Government.

The Saskatchewan Government has formally made such a request and the necessary implementing order is being passed.

MOTHER!

Clean Child's Bowels with "California Fig Syrup"

Even a sick child loves the "Truly" name of California Fig Syrup. If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or who sits a truant to cleanse the liver and bowels, in a few hours you can see your well-played child again.

Millions of mothers keep "California Fig Syrup" handy. They know a truant child today saves tomorrow. Ask your druggist for genuine "California Fig Syrup." It has all ages printed on bottle. Mother! You must say "California" or you get an imitation fig syrup.

Millions of mothers keep "California Fig Syrup" handy. They know a truant child today saves tomorrow. Ask your druggist for genuine "California Fig Syrup." It has all ages printed on bottle. Mother! You must say "California" or you get an imitation fig syrup.

DON'T LOSE ANOTHER HAIR

35c "Danderine" Saves Your Hair—Ends Dandruff!

Delightful Tonic

Don't lose another hair! Don't tolerate destructive dandruff! A little Danderine now will save your hair, thicken and strengthen it, double its beauty.

Put a hair never stop by itself! Danderine multiplies until it forms a crusty scale, destroying the hair roots and all resulting in baldness.

Your druggist will tell you that "Danderine" is the largest selling hair never in the world because it corrects and cures such ailing hair of men and women every time. Use one bottle of Danderine, then if you find a single falling hair or a particle of dandruff you can have your money back.

Seized British Ship Released U.S. Decided Prohibition Enforcement Had Not Been Violated

New York, N.Y.—The British schooner Bannockburn, N.S., which was seized on September 14 with a cargo of liquor nine miles off the New Jersey coast, was released by United States customs authorities on instructions from the Treasury Department.

The release was in line with the decision to hold no ships found outside the three-mile limit for violation of the prohibition enforcement law unless it could be proved they were communicating with the shore by means of their own small boats.

Combating The Grasshopper Plague

Interesting Summary of Good Work Accomplished in Saskatchewan

A highly satisfactory distribution in the amount of damage done by grasshoppers is the principal feature of the report on the grasshopper campaign, which has just been compiled by Mr. M. P. Tullis, Field Crops Commissioner of the Saskatchewan Department of Agriculture.

"One hundred and thirty-seven municipalities," says Mr. Tullis, "purchased supplies and co-operated in the fight against the pest, which by far, were municipalities than in 1921. In that year the estimated loss was ninety-three thousand acres, a marked and satisfactory decline. The savings this year was approximately six hundred and forty thousand acres."

"Working conditions, growth of the crop and the work of parasites have lent their aid in carrying down to different localities in different years. This year the growth of the grain was considerably above the average in most of the interested regions with the result that the hopper did not make as much headway in their work of devastation. This also gave them a better opportunity for the farmers and local officials to police effectively."

"The following supplies were used: 2,625 tons of bran, 1,671 tons of sawdust, 518,548 lbs. of alfalfa, 1,000 lbs. of arsenic, 242,760 lbs. of salt, 310 gallons of any acetate. This means that \$7,678 tons of bait were spread, and the total cost was \$125,240."

"The 'silver lining to the cloud' is the fact that the southeast part of the province where the hoppers first appeared in 1918 had little trouble in 1922 and most of their stores of poison were transferred in June and July. Western sections of the province were needed. It is hoped that 1923 will show further areas past the peak of the pest."

Mr. Tullis briefly reviewed the circumstances connected with the grasshopper outbreaks during the last three years, during which campaigns had to be conducted.

"There had been," said Mr. Tullis, "no invasion of hoppers for very many years. In fact not since the days of the first early settlement in Manitoba. Consequently when the first appearance of grasshoppers was noted in 1918, the people were quite unprepared for what was to follow, and not realizing the seriousness of the outbreak and the damage involved, many farmers were at first slow to adopt the necessary measures for control."

On May 25, 1918, the Department of Agriculture was informed by telegraph from the Carleton district that young grasshoppers were appearing in thousands and cutting down growing crops in their march. A number of the department's officials, accompanied by Mr. A. H. Tullis, then man Cridle, Dominion Entomologist, left immediately to investigate, and found that instead of being merely a local outbreak the pest was spreading, until finally it was found forty-six rural municipalities, in an area about fifty miles wide, from northwestern to Saskatoon and Menden, were all infested and suffering more or less damage. Hon. C. A. Manning, then Minister of Agriculture, announced that the Department of Agriculture would bear the entire cost of the fight against the pest in the form of poison, and that the municipalities would supply the lemon, molasses and bran. The government in this year spent on poison the sum of \$51,900 and the municipalities, for the other ingredients at least as much again. The result was that, according to careful estimates, 100,000 acres of crop were saved, 75,000 acres were destroyed and 225 tons of poison were distributed.

"In the following year there was a much more serious outbreak. No less than 97 rural municipalities, or almost one-third of the entire province, were involved. The Field Crops Branch and the farmers, however, were fully alive to damage and energetic measures were taken, in which the municipalities heartily co-operated. Immense supply of material for poisoning was distributed. Infested country was thoroughly organized in 'hopper brigades,' each division had a lieutenant in charge of the campaign who had the right to volunteer helpers, mixing stations were established, and, in short, every thing possible was done to meet the situation. The results were good. It was estimated that 1,400,000 acres of crop were saved, and only 45,000 acres were destroyed. The cost of the department and the municipalities combined was \$237,480 and 7,000 tons of poison had been used."

"During the session of 1920-21 of the legislature, an amendment to The Rural Municipality Act was passed which enabled the municipalities to levy money, on the passage of a by-law, for the destruction of grasshoppers the money to be received from the owners or occupiers of land in the same way as municipal taxes."

"By the season of 1921, the same methods of organization as were followed in 1920 were again employed. Hoppers began to be reported in May, and the campaign was soon in full swing. A very large saving was effected by the substitution of small acetate for the citrus fruit and sawdust for half the bran, so that although 9,162 tons of poison bait was spread, the cost was reduced to \$155,000. The area infested was less than in 1920, 95 municipalities reporting damage. A total of 1,060,000 acres were saved, and 25,000 acres of crop were destroyed."

"Summarizing the situation," said Mr. Tullis, "It is found that in the four years 1919 to 1922, grasshoppers have cost the sum of \$147,023 in supplies alone, assuming that in 1919 the municipalities paid out an equal sum to that spent by the Field Crops Branch. In all 25,226 tons of poison bait, or enough to fill 800 freight cars (a train 5 miles long), were spread. The number of acres of crop saved in the four campaigns was 2,224,000, and the number of acres destroyed amounted to 216,000. While the amount of \$147,023 meant a heavy drain on the municipal and provincial revenues, when one figures the value of the crop of three million acres, that figure, large as it undoubtedly is, sinks into insignificance."

"Great states of ice have been replaced by moraines of earth and stones, the storm continued, while at many points well known glaciers have entirely disappeared. Very few seals and no whitebears are being found in the eastern Arctic, while vast herds of caribou and muskoxen have never before ventured so far north as they are being encountered in the old seal fishing grounds."

Training Post Office Staff
Classes in Old London to Teach Clerks Civility

Critics have long remarked that London's post office is the most unpolite in the United Kingdom. Now the Post Office has agreed that there is need of improvement, and classes have been instituted for the purpose of teaching civility to the staff.

It was the post office staffs themselves who suggested that the courses should be started. The Post Office has been told how to give the staff answer in the hundred and one situations that expatriate the staff of clerks in an address. The staff for a shilling's worth of new copper or the offer of £5 in silver two minutes before closing time.

Motorists Bring \$100,000,000
Beauties of Canada Attracting American Motorists in Larger Numbers

An estimate published in New York places the amount of money spent in Canada by American automobile tourists in the last twelve months at \$100,000,000. It is known that in that period more than 600,000 American motor cars crossed the border and that the number of tourists has reached by assuming that each party spent on an average of \$325 a day, and that the number of cars is 1,800,000. With further improvement of the Canadian highway system, now under way, there is no doubt that the beauty of Canada will in the future attract even greater numbers of American motorists.

A REAL IMMIGRATION POLICY AT LAST

The Care of the Feeble-minded

Work for Provincial Organizations in the Training of Mental Defectives

The havoc wrought by the non-care of the mentally deficient is terrible and is coming to be widely known. They are the cause of half the crime in general, two-thirds of prostitution, in particular, two-thirds of venereal disease, and a large proportion of illegitimacy and of sexual vice.

The cost of caring for the fruits of this have in maintaining courts, jails, prisons, reformatories, industrial farms, and rescue homes is a heavy burden on the taxpayer and on private charity.

Prevention is always more worth while than cure even where cure is possible, though in time it can be prevented. Let us consider first what to do with mentally defective children of school age. They cannot be trained in the same classes with normal children. They lag behind, become discouraged, and get no benefit themselves. They retard the normal children. They become a nuisance to the teacher, taking far more than their share of attention and all to little purpose. They are the source of constant also of demoralizing school discipline, and usually also of aimless idleness and vice among the other pupils.

What then is to be done? In cities and other large school districts there is no serious difficulty. They should be examined and placed in a special class or in a separate building. They should be examined and placed in a special class or in a separate building.

How Far Can a Locomotive Jump?

Going at High Speed Can Leap Across a Measureable Space

Look over a locomotive as it stands in a train shed, and you regard its impressive bulk with a certain degree of awe. You cannot imagine this huge steel monster jumping at all. You would say that it couldn't jump. Imagine its solid supporting track removed, and you would predict that gravity would claim its own, regardless of the speed at which it might be traveling.

Stand close to the track as the locomotive rushes past at 60 miles an hour, and you get another, and quite different impression—that of incredible force, propelled at a speed which would hurt it across a sheer open space like a ball fired from a powerful gun.

And then you change your opinion. Yes, you conclude, that vast though its weight and clumsy its proportions, it might leap across a measurable space with rather a flat trajectory.

The bridge engineer of a certain railway showed me, some years ago, a photograph of a locomotive taken just after it had leaped across a 25-foot opening. The big drivewheels rested securely on the cross-ties after jumping the span left vacant by an open drawbridge.

The locomotive had been at the head of a flat freight train of the open drawbridge. The big drivewheels leaped the gap, and the locomotive landed on the right side up and undamaged. The tender fell into the opening, and cars piled up in a heap between two abutments.

An engineer in the maintenance-of-way department of a mid-west railway told me the following story, which I have verified, for it was difficult to believe.

A small stone culvert was to be replaced by an iron pipe. There was a sufficient interval between regular trains to complete the work. Red flags were posted at the prescribed distances in both directions. A gang of workmen excavated the small culvert over the culvert and removed the stone abutments.

At this stage of the work, 15 feet of the steel rails only spanned the opening. From them the cross-ties hung by the spikes. Underneath the ties for a height of some 6 feet, there was nothing but air.

There came the distant rumble of an approaching train. It was a "special" and the red flag having blown over, it came rushing on at full speed.

The locomotive leaped the gap, and the train followed. The workmen dropped their tools and ran headlong into the open field. The foreman ran, too, not venturing to look back, and expecting to be killed by the train.

Finally, at a safe distance, he turned to look. The special was fast disappearing from sight. It had crossed 15 feet of unsupported rails and continued on its way.

Not only had the locomotive jumped the space, but to the amazement of all, three cars behind it had safely negotiated the hazardous crossing.

By Francis W. Wilson, in the November Popular Mechanics Magazine.

Composition Stronger Than Original Wood

Substitute Found to be Tougher Than Real Article

A wood composition, stronger and better than the real article is being made from sawdust and shavings as a result of research made by Prof. George Kennerly, of the University of Wisconsin.

The sawdust is mixed with a new binding material which Professor Kennerly discovered and perfected. The mixture is subjected to pressure and the resulting product is said to be much tougher and harder than ordinary wood, does not split and is impervious to water.

The chief use of the wood composition, Professor Kennerly says, is in the manufacture of irregular shaped articles, such as toilet sets, radio dials and other wood products that are difficult to carve.

Another advantage is said to be the composition with which articles can be manufactured. Using the new material the wood product, mixed with the binder is put in a mold of the desired shape and size, placed under pressure, and a hard elastic, grainless article without joints is produced quickly and at cost which compares favorably with the regular wood product, according to the university statement.

Products manufactured from the composition do not break or chip and are said to hold screws firmly. Although the material can be produced in a half, it is very difficult to cut with a knife.

At present Professor Kennerly is working on the idea of making the composition for automobile steering wheels and finds that the process is suited to the purpose.

How Many Meals Should We Eat?

Rule Cannot Be Made That Would Suit All People

A woman has lately died who for many years had lived on one light meal a day, and some people there upon jumped to the conclusion that one meal a day is sufficient for everybody.

But that is a rash and foolish conclusion. Even as there are big motor cars of great horsepower, so there are big people of great man power and little people of small man power; and even as big motor cars of great horsepower require more petrol, so little motor cars of small horsepower, so big people of great man power require more food than little people of small power.

We all have different capacities for developing and using power, and require different amounts of food. It is ridiculous to compare a little weak woman with a strong man.

A light meal once on a day is not enough. It would overload the digestive organs. The plan of taking food at intervals is best.

He Was Neutral

A prisoner in camp was asked the usual question, "Gully or not gully?" "Yes," responded the man at the bar.

"What's that?" asked the judge, sharply.

"It was asked whether I was gully or not gully, and of course, I am of the two conditions I could not well escape both."

"But which are you?" "Oh, on no, judge! What's the jury for?"—Los Angeles Times.

Turks Hate "Christian Dogs"

When Aroused Their Violence is Almost Unbelievable Says American Nurse

Down in his heart the Turk deeply despises the "Christian dogs" of Europeans, no matter how unreflexively they may treat him. Once aroused, the violence of the Turks is almost unbelievable. He declares as a matter of course, a Miss Helena Ventris, who served among the Greeks and Turks in a hospital in Smyrna in 1914. To outward appearance a patient may be a Polish or European with charming manners. In a flash there may be a terrifying reversion to the Turk, crazed by anger, is capable of any thing.

To this connection, doctors and nurses would be interested to know of the elaborate precautions taken by a Greek doctor who in the hospital where the American nurse was employed, had to summon the family of a patient who was dying. The patient, a Turkish boy, had been operated upon, and was sinking fast. The Greek doctor was terrified. Knowing the Turks as he did, he realized that the parents might kill him and take vengeance, declaring the lad had been murdered with Christian drugs.

The Turkish family were summoned, but in the meantime the doctor had obtained what aid he could for their own personal protection, in case they were attacked. The door of the sick room was opened and the proper prayers were laid upon the floor, care fully fading, of course, toward Mecca.

But when they had progressed to a certain stage the doctor whispered to his family, and they retreated to the right, and the critical period passed. This proved to be so, and following the death of the patient, the family quietly withdrew. The doctor, who was so stoical about the matter, and displayed no interest whatever in the disposal of the body, for them the incident was closed.

The doctors are not always so fortunate, however. One day a Greek doctor, who was summoned to the hospital came in with blackened eyes scratched face and torn clothes. While quieting the matter, he admitted he had been set upon by the relatives of a patient he had been treating for diphtheria and literally beaten up. It was entirely useless to explain that the disease was serious, and the patient's weakness due to natural causes. It was explained to him that they had seen their relative enter the hospital comparatively strong and well and grow weaker under the ministrations of the doctor.

The Turks have hospitals of their own in Smyrna, but what transpires there is not so well known. The nurses in the Greek hospital of Smyrna made repeated attempts to enter these hospitals, but were always refused admittance, though with perfect politeness. On their insisting, they were referred to the Turkish hospital, where the same quest was turned down. The Turks have of late gained respect for modern ideas of sanitation, but this is not the case with the Turkish hospital, and certainly the facts revealed are not as a rule belittling, but in conservative Smyrna they still cling to the old customs and traditions of the world through two holes in a hideous yashmak. A Greek doctor, after requesting a woman patient to disrobe that he might examine her, dismissed the case, remarking that he was no human X-ray machine.—Toronto Telegram.

Islanders Make Business of Trapping Them During Migration

Holmhead which became so well known during the war is a favorite place for the migration of the birds. In the season of the year the island is visited to many an air raid from the feathered tribes migrating from the north. The birds are so numerous, and certainly the facts revealed are not as a rule belittling, but in conservative Smyrna they still cling to the old customs and traditions of the world through two holes in a hideous yashmak. A Greek doctor, after requesting a woman patient to disrobe that he might examine her, dismissed the case, remarking that he was no human X-ray machine.—Toronto Telegram.

Burdett News

From our own Correspondent

John Stewart has returned from the Fruit Farm in Bell River, B.C. his log house and buildings looked good to him after his long sojourn on the bald prairie

Mrs. Roy Lindwall has returned home after a two weeks visit with her mother Mrs. W.L. Fletcher of Magrath

Mrs. M. L. Small who has been spending a few days in Lethbridge has returned home

Last Sunday evening Nov. 26 owing to the illness of the Pastor, Rev. P. Johnson, there was no service in the United Church. Mr. Johnson was suffering from a severe cold which affected his vocal organs so that he could not speak above a whisper. D. V. there will be services as usual next Sunday December 3rd.

Mr. and Mrs. F.L. Barnes and family of Big Valley, Alta. motored in this week to visit with relatives here

Mr. J. C. Webber of the C.P.R. Calgary was in town on business Wednesday

Don't forget the Big Bazaar on Saturday, Come and buy your Xmas Presents

We much regret to announce that Mrs. Aybushnot has been confined to bed since the 13th. November with a very bad attack of Neuralgia in the head, and Mrs. Stewart has been nursing her

Mr. L. DeBelld and Mr. Bole were Row Island visitors last Friday

Scotch Fishermen In Want As Herring Seeks Other Waters

The failure of the herring industry in the North Sea, during the last two years, has been due to the fact that the gurents in the North Sea have changed their course, says the chairman of the Scottish Fishery Board. The huge shoals of herrings which once inhabited the North Sea near the Scottish coast, have almost entirely disappeared, and with them the living of scores of fishfolk

Scientists are preparing a report and a chart which will explain and illustrate the changes of the currents. Bottles which usually travelled south are now picked up in the Shetlands

Mrs. Oliver Durnall's many friends are glad to learn she has recovered entirely from her recent illness, and was able to leave the hospital and return home last week

The local U.F.A. held a Special Meeting last Saturday, the business was the appointing of delegates to attend convention

Mr. Alex Smith is visiting Calgary and Hanna on business expecting to return November 30th.

Mrs. Paul Medhurst of Foremost and Mr. Russell of Bow Island motored to Winnipeg Tuesday

Mrs. Geo. Elliot's many friends were glad to know she returned from Medicine Hat Hospital last week feeling much better

Hull River - Medicine Hat, Alberta

CHIROPRACTIC (Spinal Adjustments)

It is a strictly drugless and non-surgical method. Acute and Chronic ailments both yield to it. It proves very beneficial in Nervous troubles, Headaches, Fevers, Skin Eruptions, Asthma, Lumbago, Sciatica, Rheumatism, Constipation, Appendicitis, Gall Stones, Gout, Female complaints, etc., and in diseases of the internal organs such as Lungs, Stomach, Liver, Spleen, Kidneys, etc.

Take Chiropractic Adjustments and be Healthy and therefore Happy

Mrs. Rodgers spent the week end visiting little Margaret who is under medical treatment at Medicine Hat Hospital

M.H. Smith made a business trip to Medicine Hat Nov. 24th. between trains

Mrs. Oliver Durnall's many friends are glad to learn she has recovered entirely from her recent illness, and was able to leave the hospital and return home last week

The local U.F.A. held a Special Meeting last Saturday, the business was the appointing of delegates to attend convention

Mr. Alex Smith is visiting Calgary and Hanna on business expecting to return November 30th.

Mrs. Paul Medhurst of Foremost and Mr. Russell of Bow Island motored to Winnipeg Tuesday

Mrs. Geo. Elliot's many friends were glad to know she returned from Medicine Hat Hospital last week feeling much better

Hull River - Medicine Hat, Alberta

Mrs. Will Campbell left Nov. 24th. for the State of Kansas expecting to be away until spring. Mr. Campbell accompanied her as far as Lethbridge to see a few days

Mr. and Mrs. Jack Webster Sunday evening at the home of Mr. and Mrs. T. Hickmore

Mr. L.L. Lacey's many friends are glad to learn he is entirely over his injuries, he received from a runaway, which demolished his buggy completely

Mr. A.G. Campbell of Toronto was a business visitor Monday Nov. 27th.

Frost can be removed from window panes by rubbing them with a cloth dipped in salt

To patch a window blind, take the piece of material, dip in boiling starch, lay it over the tear or hole, and press with hot iron. This is better than sewing on the patch, for blinds are often so brittle that they cannot bear mending with needle and thread

To clean windows easily and effectively, wash them well with a fairly wet clean leather, then wipe the leather, wring it until fairly dry and wipe over the windows. A brilliant and clean surface is thus insured. Looking glasses and pictures may be cleaned in this manner, but care should be taken to wipe off the leather, so that it is fairly dry before the final polish takes place

Grassy Lake

held Successful Bazaar and Dance

The Ladies Club of Morning Star School held a most successful Bazaar and Dance at the School House on Friday 17th. November—a big crowd was there and everything went off fine and everybody had a splendid time

The ladies wished to purchase a Piano for the School house and so they got up this Bazaar and Dance and as it was such a big success, they will now have their Piano—there is nothing like winning in Unity to gain Success and the ladies by doing that have taken about \$250 so it is said, which is a great credit to them and a tribute to their energy and hard work

On account of the bad weather some had to stay till 8 o'clock the next morning

The display of Fancy Work was much admired and attracted much attention as also did the Dolls Booth

but the main attraction being the "Gipsy Fortune Teller", the Fish Pond was also well patronized and the little "Candy Lady" was all sold out before supper

And the Tea Booth proved a regular "Life Saver" and was kept busy until after 12 p.m.

And then came the Big Dance which was the final link in making this affair a Big Happy Time for all

Then followed the Raffles at Midnight. Mr. Fred Dyck of Grassy Lake won the Organ. Mr. Merrett Potter of Morning Star district won the fine quilt. Mr. S. Suttler of Morning Star district, won some nice Pillow Slips. Mrs. Hugh Scott won a nice Pillow, and Sandy Odell won the very pretty Diamond Doll—Sandy wore a saddle that was "Guaranteed Not to Wear Off"

"The Review" thinks that all who worked so hard for this "Big Success" are to be heartily congratulated

A meeting was held in the morning Star School house on Thursday evening 22nd. November to form a U.F.A. Local and also a Literary Society
